FLYSAFE GUIDELINES

The information in this document serves as basic guidelines for safe UAV operation. In addition, you must adhere to all legislation enforced by the Civil Aviation Authority and the Government of Barbados.

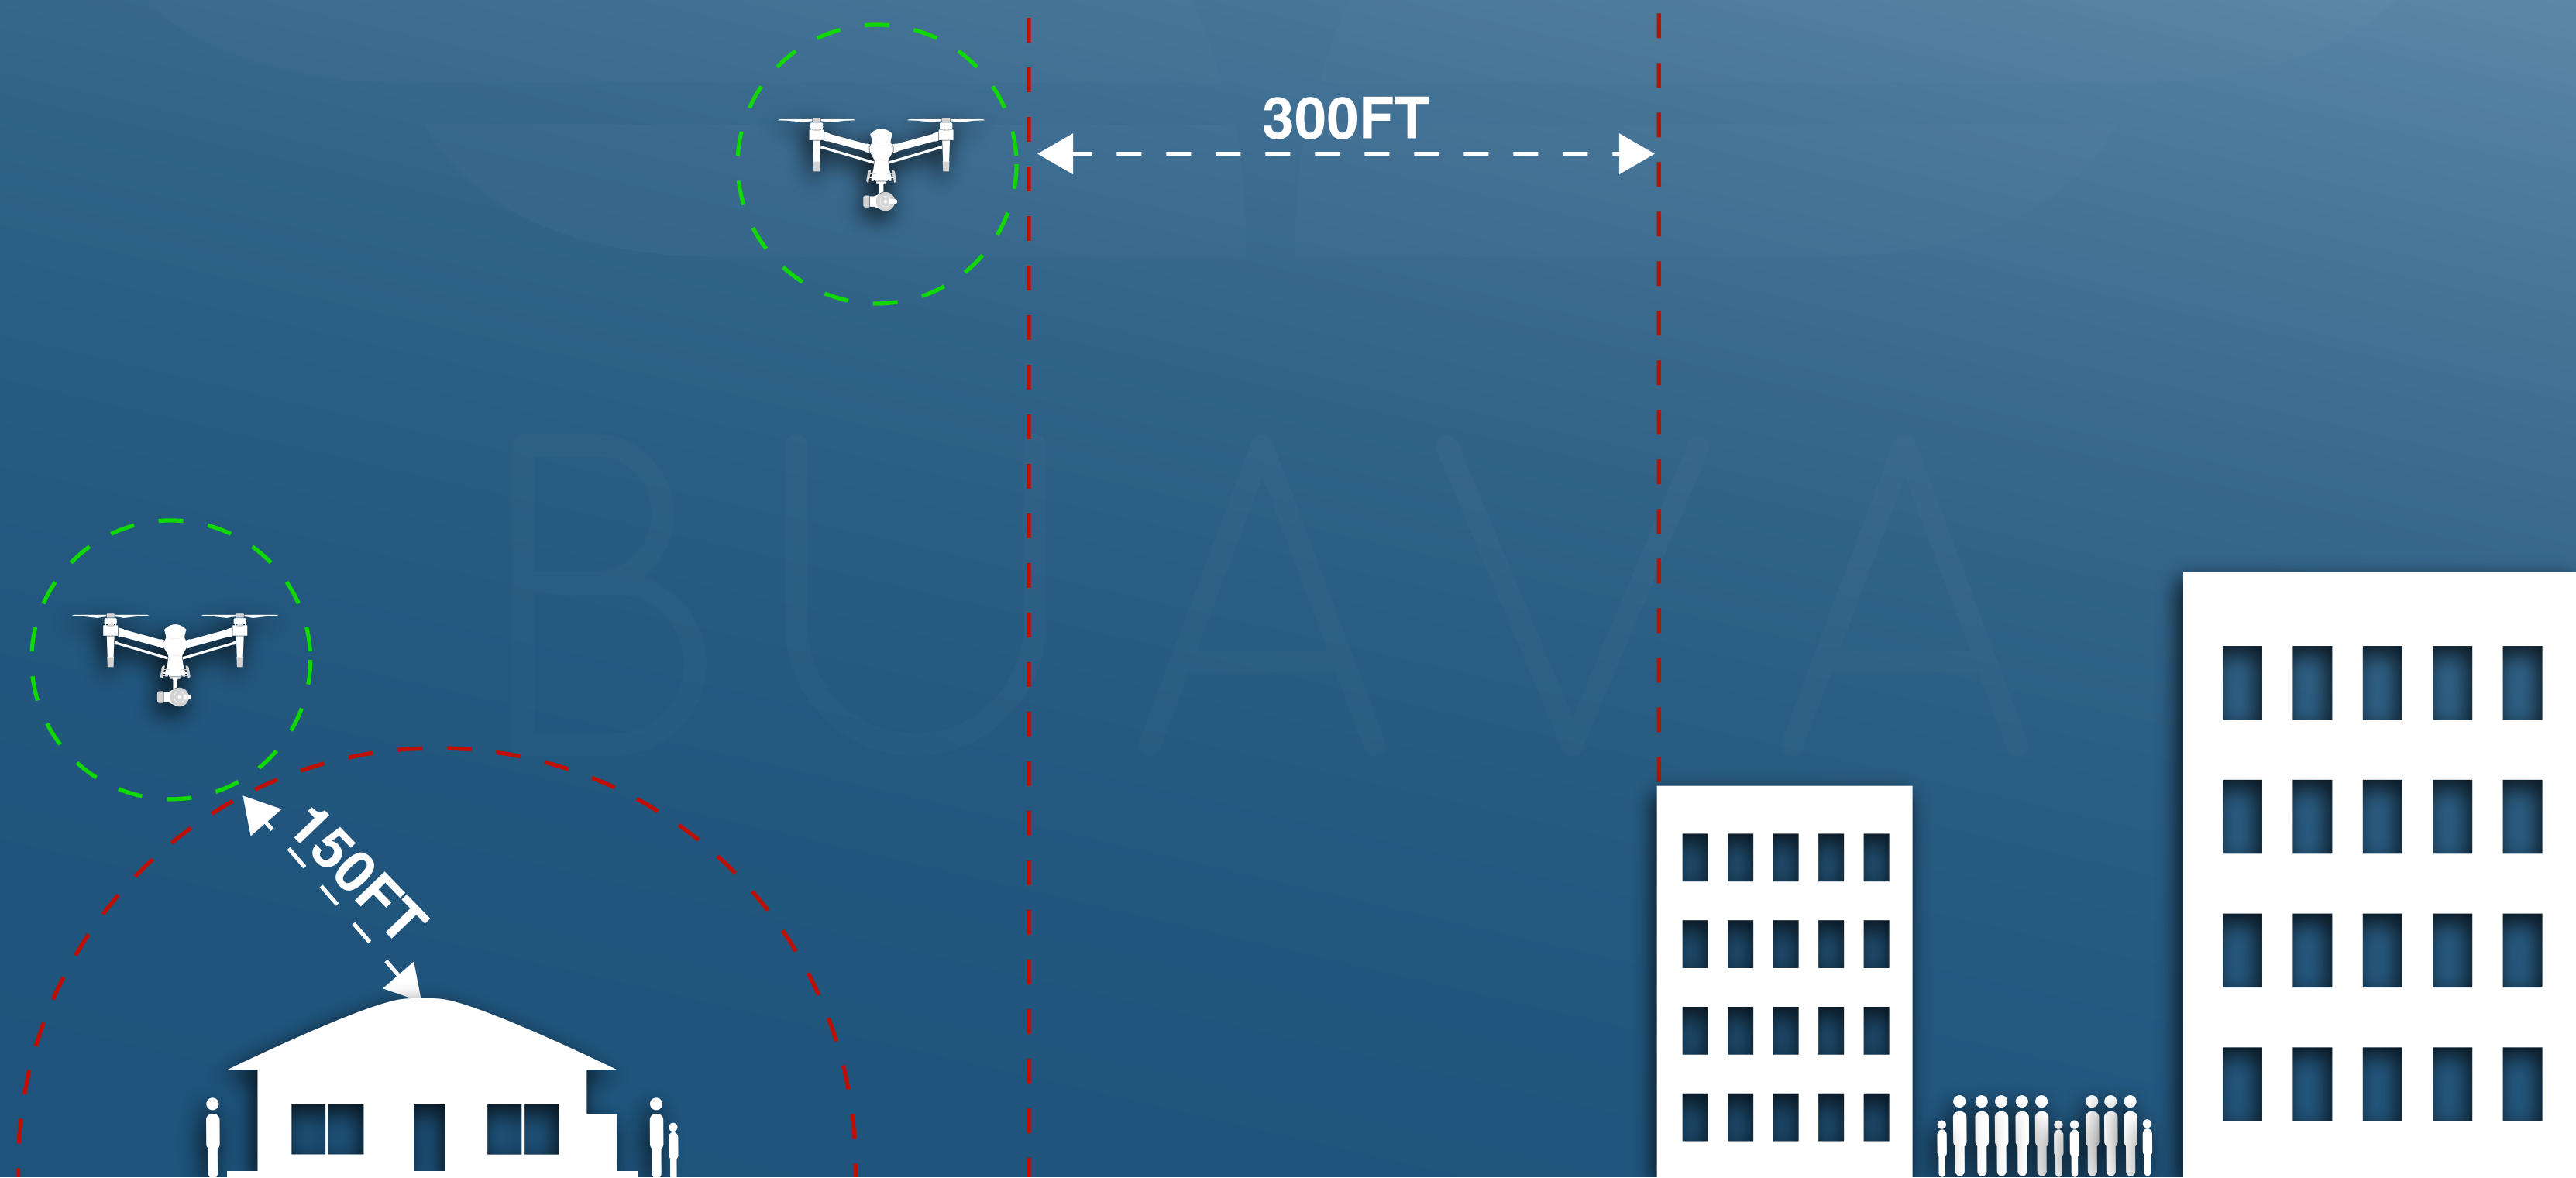

You must not fly within 5 kilometers of the airport unless authorized by the Civil Aviation Authority

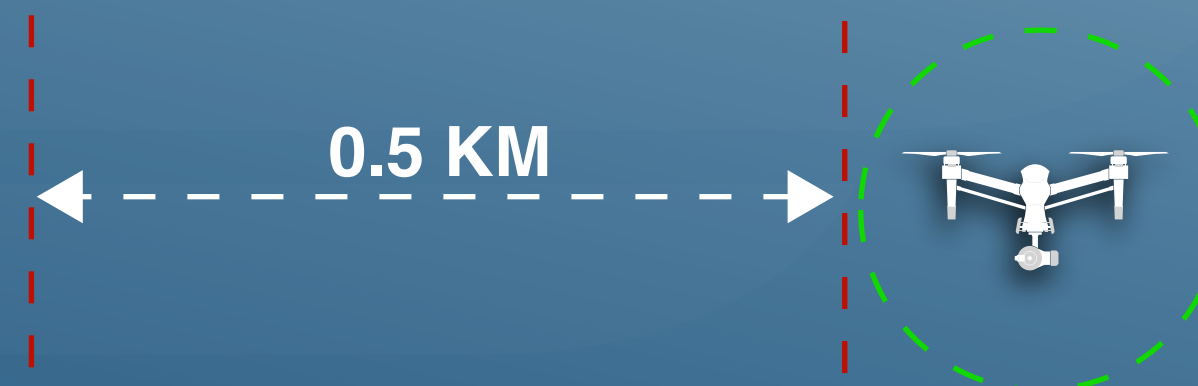

You must stay below 400FT at all times to avoid the potential risk of collision with manned aircraft

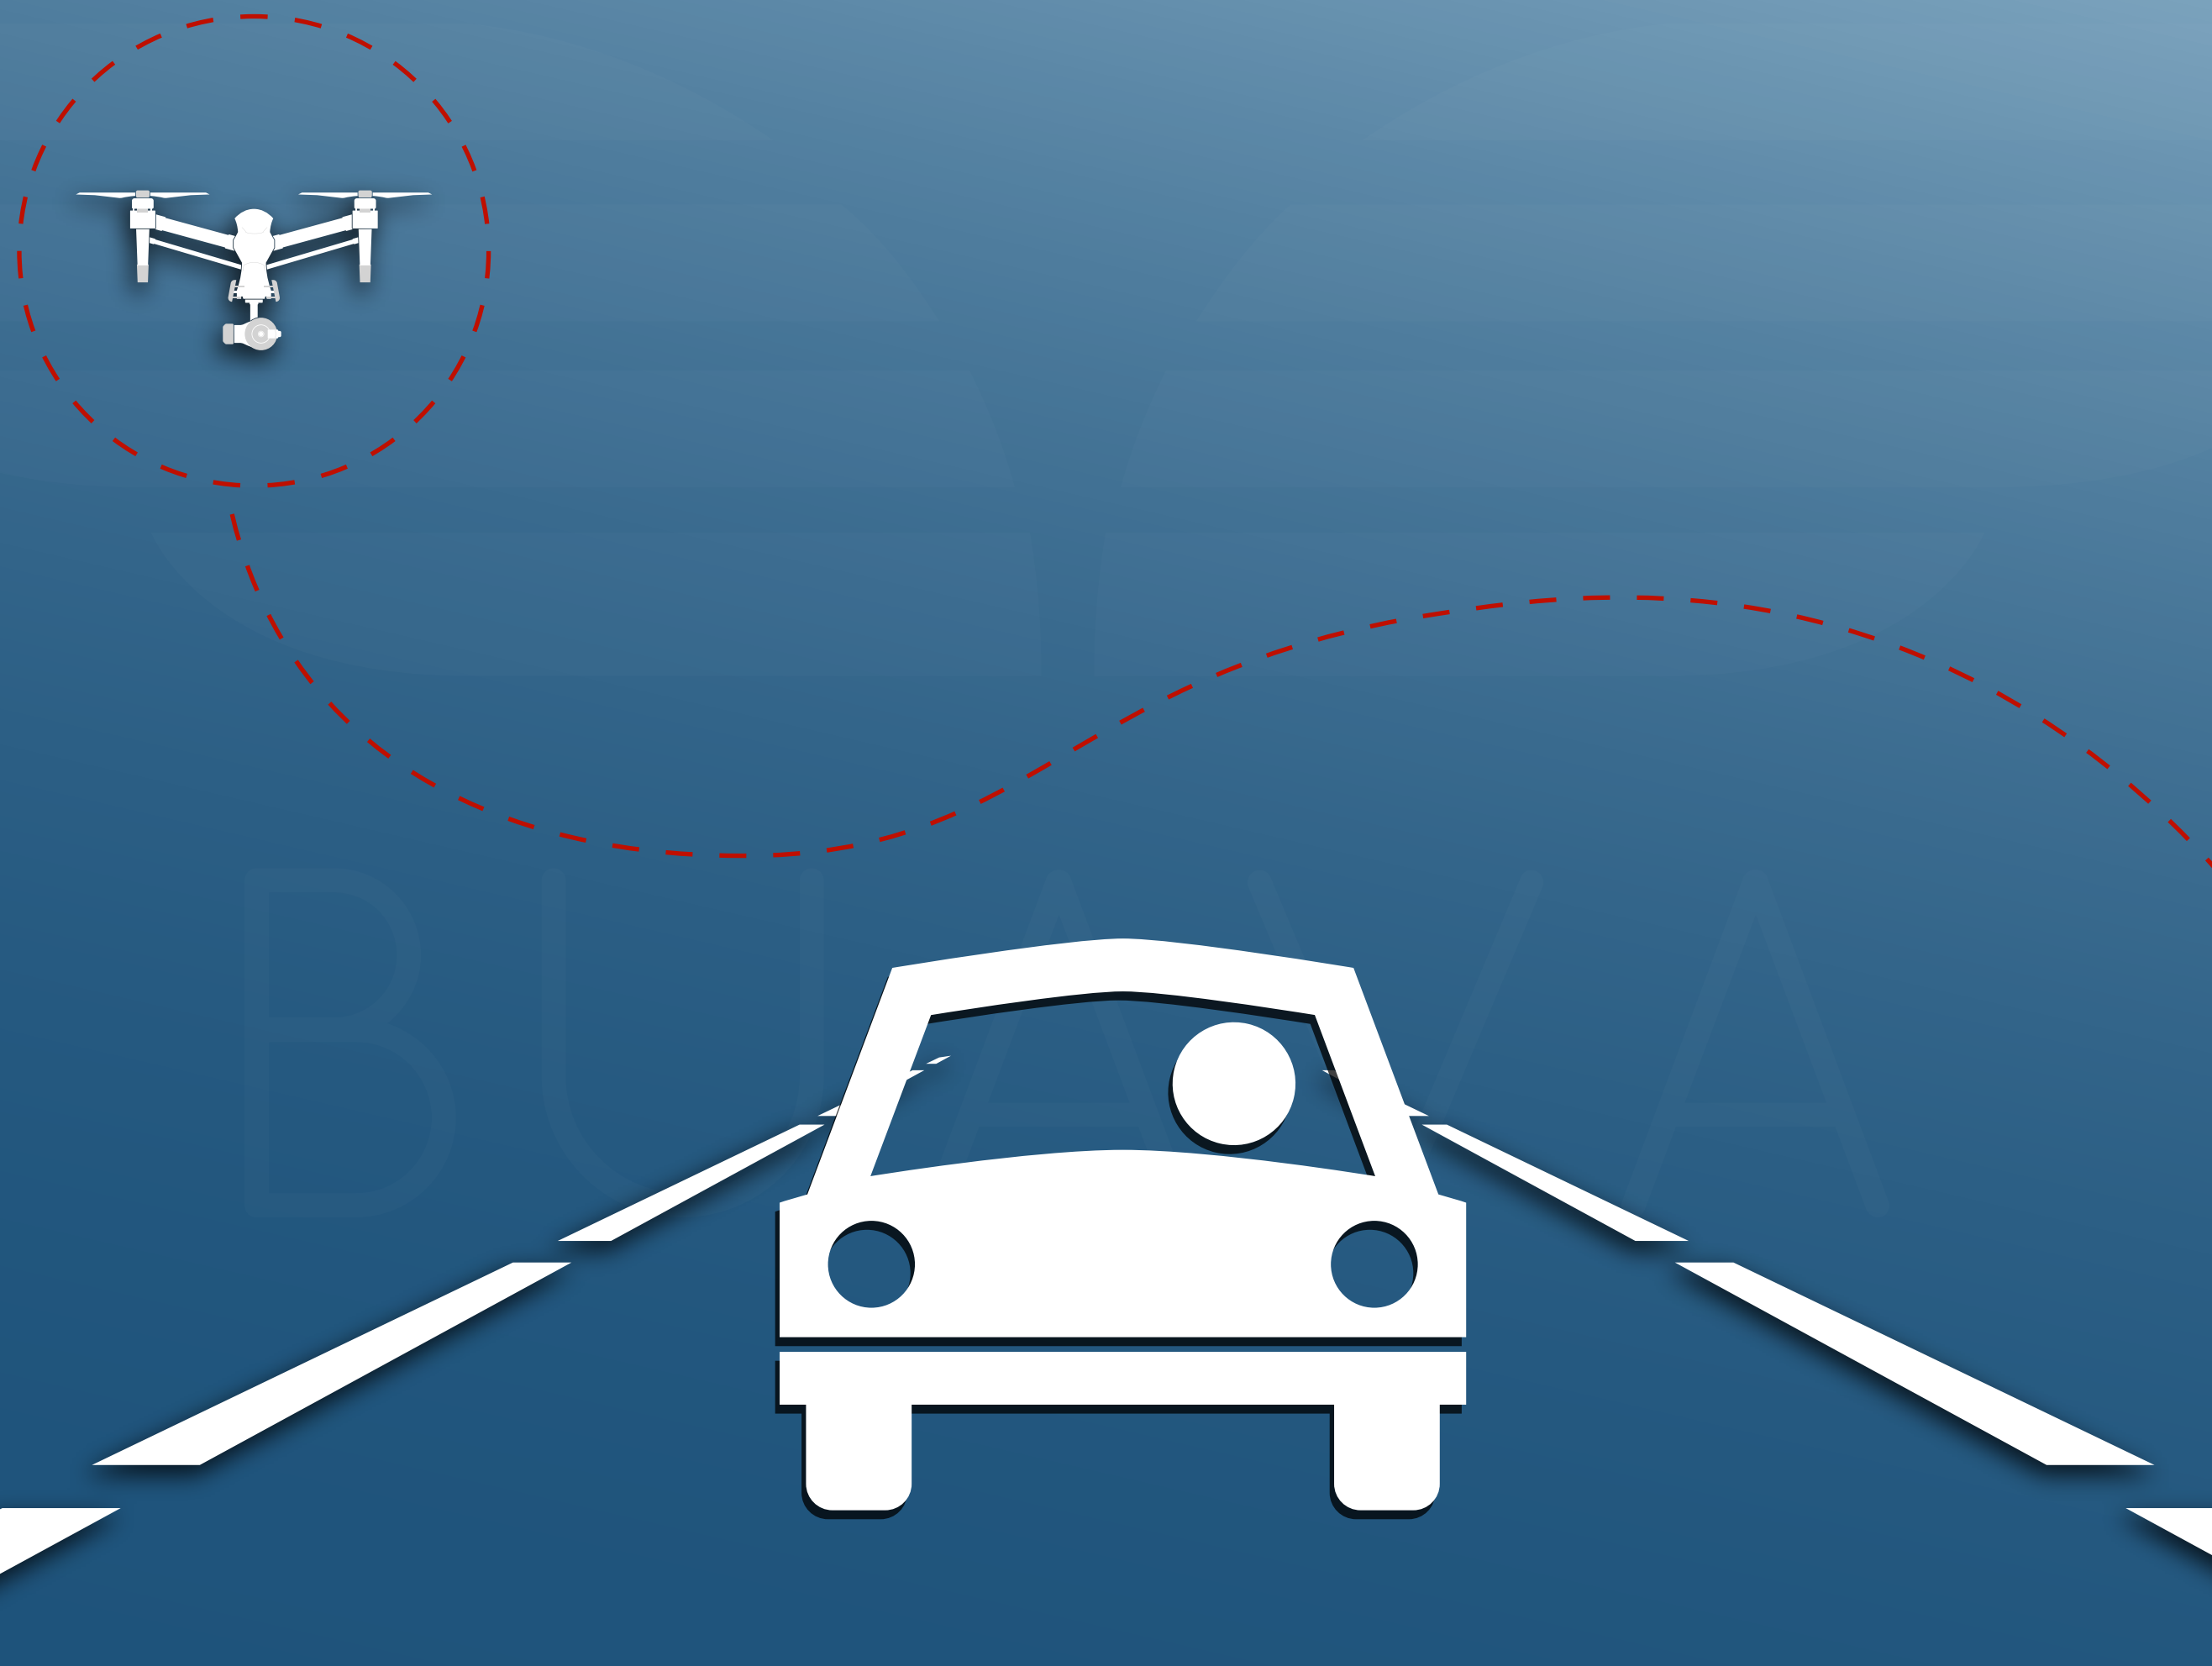

You must not fly within 150FT of people & property and 300FT of crowds & developed areas

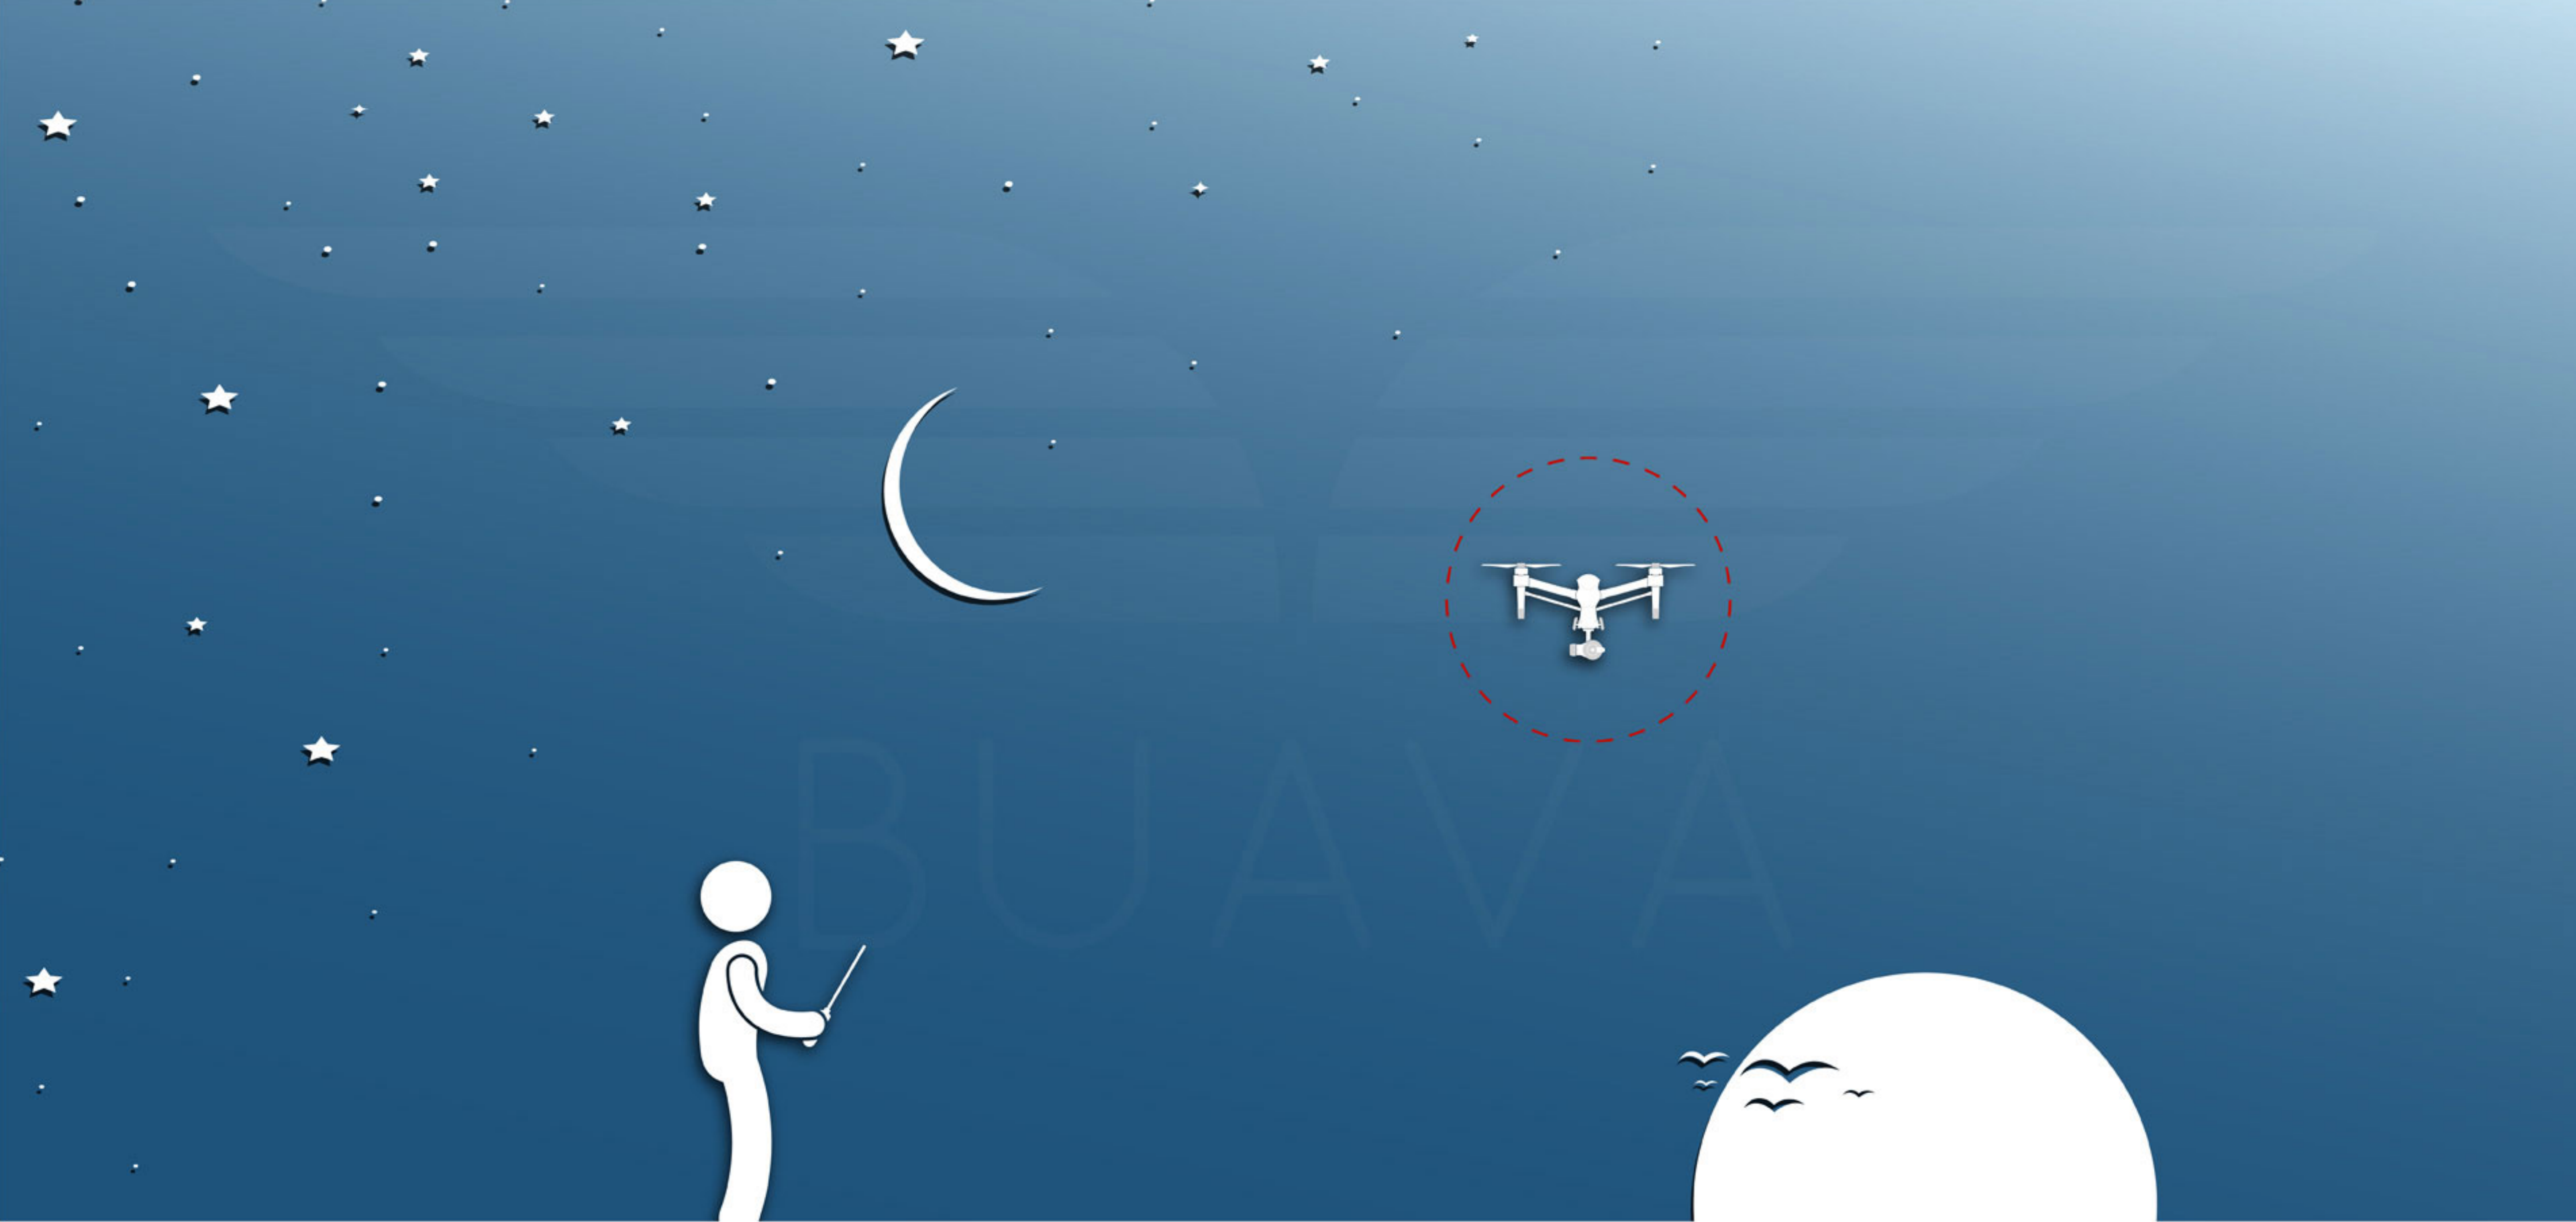

You must not fly within a 0.5 KM radius of military installations, government buildings, hospitals and prisons

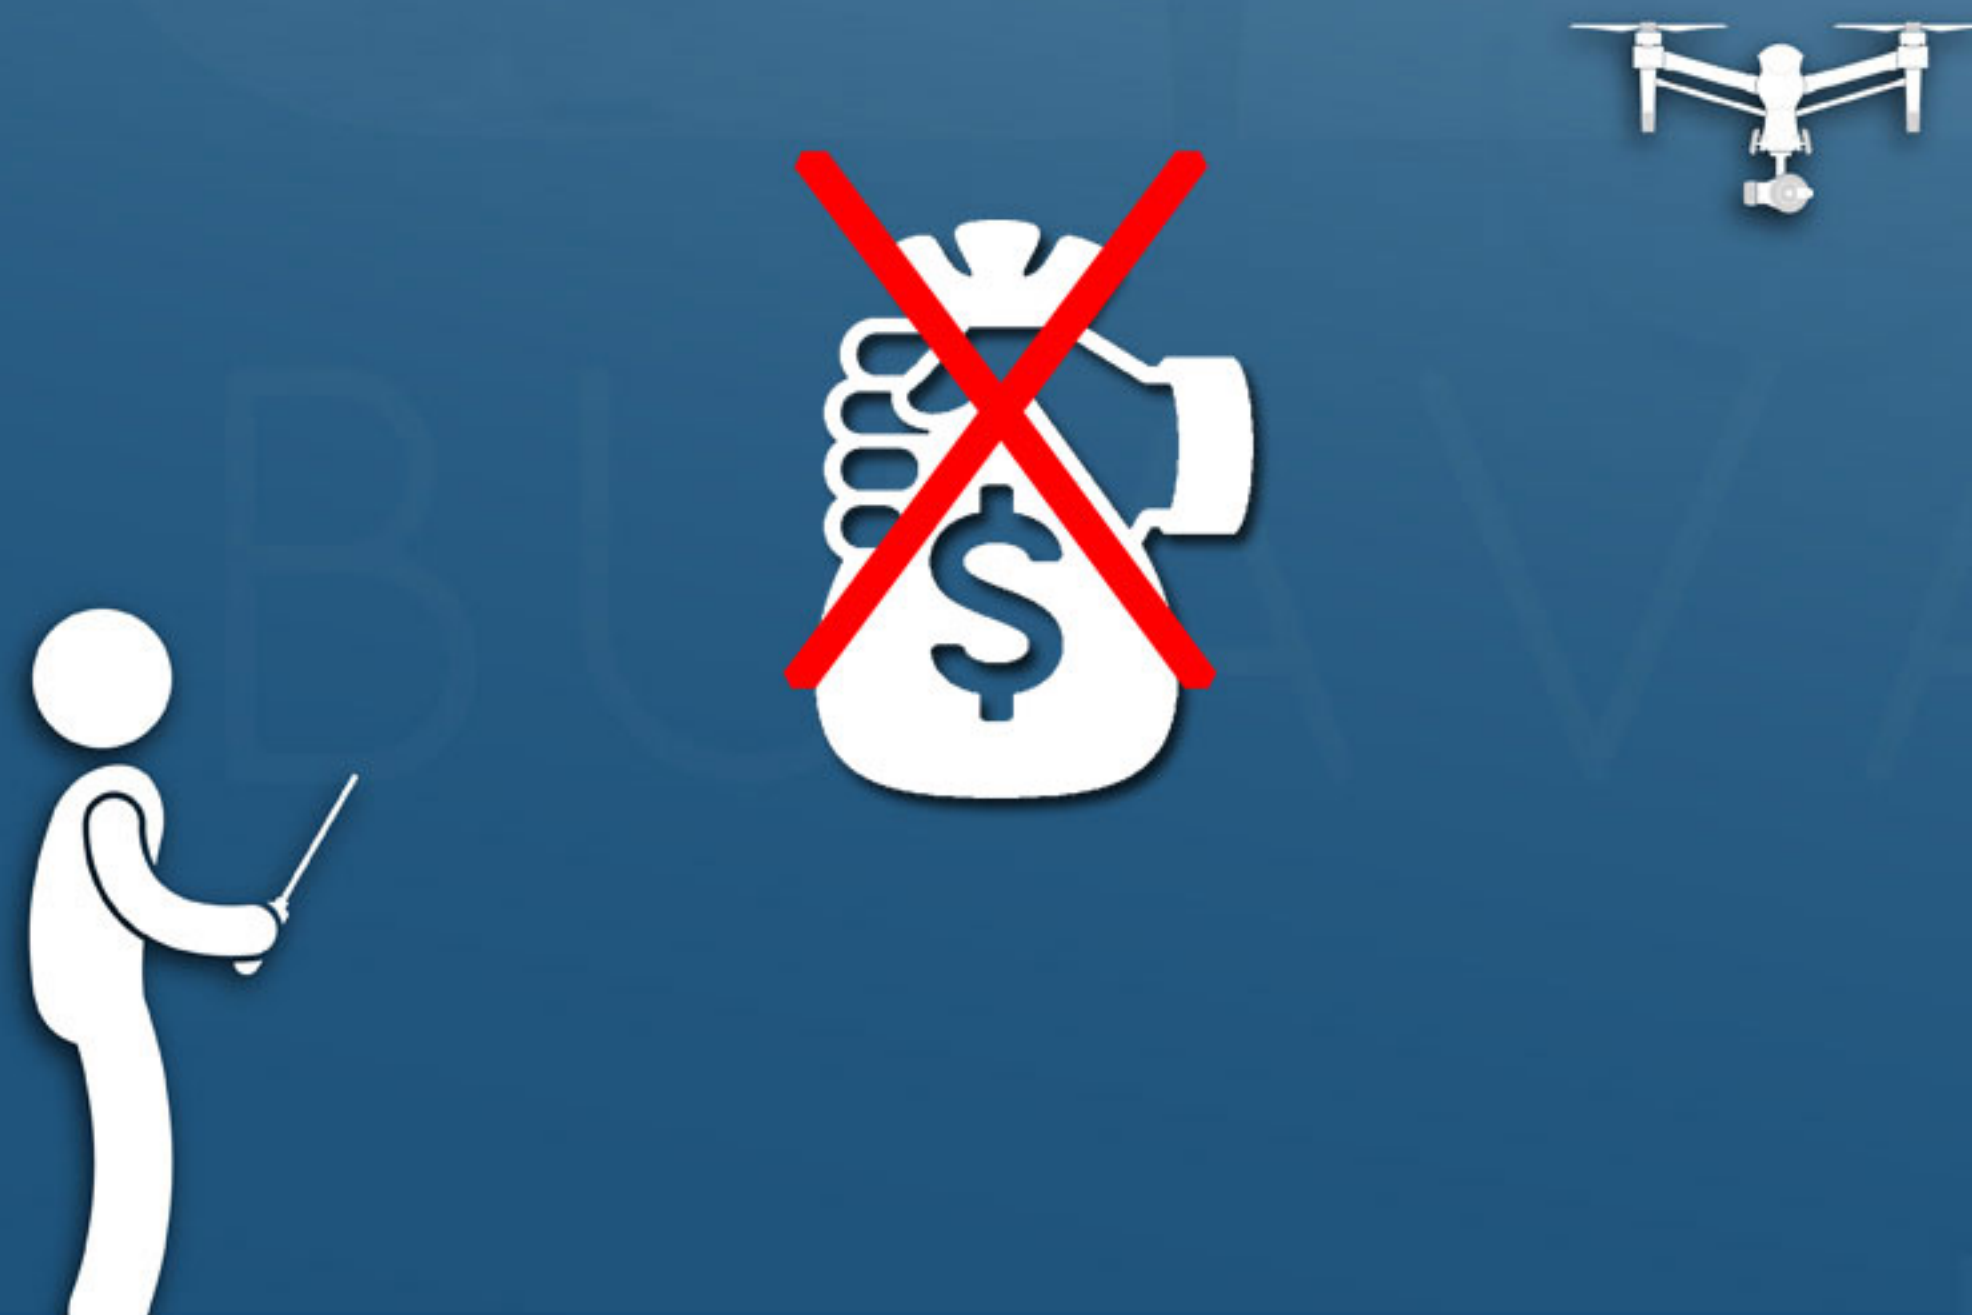

You must not fly over highways or heavily trafficked roads unless authorized by the Civil Aviation Authority

You must maintain line of sight at all times to allow you to see and avoid other things while flying

You must not fly before sunrise or after sunset unless authorized by the Civil Aviation Authority

If you wish to fly for money or economic reward, you must be approved by the CAA as a commercial operator

You are legally responsible for each flight. Failure to fly responsibly can result in criminal prosecution
